

Generic medication

Your plan offers generic options

Generic options may help you keep your medications as affordable as possible.

Generic medications work just like brand-name equals

A generic has the same active ingredients, strength and dosage as its brand-name equal. Generics don't have high development costs, so they typically cost you less.¹

Generics are FDA-approved

The U.S. Food and Drug Administration (FDA) requires generics to be as safe and effective as brand-name equals. Both types of medication must meet the same FDA standards.¹

Find out if you can save with generics

Check drug costs: Visit **Caremark.com** or download the CVS Health® mobile app* to compare drug costs and see where you can save.

Current prescriptions: Ask your provider if changing to a generic is right for you.

New prescriptions: Ask your provider if there is a generic option that's right for you.

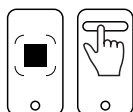

~87%

of all CVS Caremark® prescriptions are for generics.²
